Martin Gardner : Entertaining Mathematical Puzzles before purchasing it in order to gauge whether or not it would be worth my time, and all praised Entertaining Mathematical Puzzles:

0 of 0 people found the following review helpful. A few errors, but OK By Barrett Hansen Enjoyed right up to page 24. On page 24 he has a puzzle regarding which salary offer would you take. In the puzzle, you are given a choice

between two salaries, one starting at \$4K and another starting at \$2K. But in the solution given, he starts both salaries at \$4K. Just a typo I am sure, but not sure which is the error and which is correct. 1 of 1 people found the following review helpful. this puzzlemeister has never disappointed me or mine. By David McCann yet another insightful presentation by this remarkable, charming intellect. and after you have savored these puzzles, pass them on if you have children (or grandchildren) who are ready. 4 of 5 people found the following review helpful. too simple for adults and too weird for kids. By Elenalt is not challenging enough for adults. For kids, it is kind of weird sometimes. Puzzle on page 12 talks about Ms. Puffem who is trying to quit smoking. At the end author asks: "How many cigarettes can she smoke before she gives up the WEED forever"? In the solution, she dies after last puff.

Playing with mathematical riddles can be an intriguing and fun-filled pastime as popular science writer Martin Gardner proves in this entertaining collection. Puzzlists need only an elementary knowledge of math and a will to resist looking up the answer before trying to solve a problem.
