Nikoli Publishing : Expert Sudoku before purchasing it in order to gage whether or not it would be worth my time, and all praised Expert Sudoku:

My husband and I both have these and love them for waiting in airports and flying on long flights. The squares are a good size, too.18 of 18 people found the following review helpful. This is the smooth jazz equivalent of sudokuBy Lisa BrandtI have done most of the super difficult sudoku

books, and they were getting boring. Then I found this book (I was aware that Nikoli does human-made puzzles). I've solved over 100 of the puzzles, all without having to do a full mark-up, and I have loved every one of them. The puzzle-makers are correct that human-made puzzles lead you on an interesting path, while computer-made puzzles lead you to a single point of difficulty, followed by an uninteresting denouement. No, these puzzles are definitely not easy. But they allow you to follow logical steps to a conclusion. Try them. You might be excited about them!

By Gert Bo Thorgersen

I have now over 4 years been solving Sudokus for relaxing and for brain training. First starting on this after over some years in the newspapers having been seen Sudokus. And then 3 years ago after having had an accident so that I can not yet use the right hand, and besides at the same time in the engineering news reading about Sudoku. At there being that Sudoku is the best found for the brain. In a few months ago I ordered this book after having read 2 recommendations for it. In the previous 3 years I have bought nearly 20 books with Sudoku, and am looking after the most difficult. The books with Sudoku puzzles that I until now have found best are books by Will Shoertz, last bought the "Hot Sudoku", and the most difficult one from Mensa, the "Absolutely Nasty Sudoku" level 4. And most of the puzzles in these books I find more difficult than these in "Expert Sudoku". That is among other because for nearly all of the puzzles in the Expert Sudoku there are many possibilities for solving from the start, compared to the puzzles in most of the other here mentioned books. In these other books there again and again are only possibilities for doing the next step. But concerning the puzzles in "Expert Sudoku" each of these have taken me less than 30 minutes, and that including by putting in the actual puzzle on my PC's screen, including using one color for the known numbers and another color for the found numbers, one by one after having been found. Maybe I have become too good to Sudoku, but the 3 examples from the International Sudoku Competition shown in the engineering news 3 years ago, each of them took me hours. So I'm now looking after books with puzzles having difficulty closer to these. I know that I can find puzzles like these in Google, but preferring having them in books I have by hand and easily can copy in on the screen and then can continue solving when I have time. And then again after years can solve them again, on a new made file, and later compare if I the second time solved them better than the first time. I use some marks so that I can see nearly square by square, number by number, how the single puzzles were solved by me.

Expert Sudoku is an all-new collection of handcrafted puzzles for the expert puzzle-solver. This is the book that challenges skilled solvers and Sudoku-lovers at the top level every one of the 320 puzzles is rated "difficult." Good luck!
