Great guide Made the game much better for meBy MarcosAlthough I gave this game a low review, and still have many of the same problems with it (the 15 item limit that includes your weapon, armor, and spells being the largest problem) and a crappy world map, plus I really didn't care for the AP attack power meter, This guide made the game much more enjoyable for me.It is incredibly thorough, but has the basics you need if you just want a little help along the way0 of 0 people found the following review helpful. Very

Thorough Guide!By Whippet Mk.AI was amazed at the quality of this guide! I thought it was going to be a bunch of mundane tables and stats with a dull walkthrough, but I found out it was nothing of the sort. It has beautiful concept art from the game, colour-coded sections (walkthrough, tables, hints etc.) and a picture and detailed description of every item, weapon, piece of clothing, monster, boss etc. along with much more. This guide is very easy to use and will guarantee you to come out on top!1 of 1 people found the following review helpful. Definately worth the moneyBy Josh D NicholsI got the game that goes with this book, and I decided that I really needed the guide. So I looked it up on , and saw that it was cheaper than in the stores, so I ordered it. It took less time than the shippers predicted, arriving at my home 4 DAYS before it was supposed to get here. The book is proving to be very helpful...if you have this game, and need some help, I would DEFINITELY recommend this product! :)
