BM Clent, DR Shenton : SHENDOKU before purchasing it in order to gage whether or not it would be worth my time, and all praised SHENDOKU:

Shendoku is the natural evolution of SuDoku. Where Sudoku is a puzzle - Shendoku is a fun game. Where SuDoku is a lone quest, Shendoku allows two Sudoku addicts to play together in a challenging fashion - not in isolation. Unlike

many so called SuDoku games, this is NOT two people sharing a single puzzle grid with different coloured pens, nor is it A SuDoku puzzle pretending to be a multi-player game. Shendoku is to Sudoku, what Poker is to Solitaire. This book is out introductory offering, look out for the board game, web game, and other developments for PC, cellphones and possibly even on TV.
