This book describes the major aesthetic image elements-light and color, space, time-motion, and sound-and how they are used in television and film. Zettl's comprehensive coverage of aesthetic theory and his inclusion of effective visuals and examples place this text in a class by itself.

"I haven't found anything nearly as comprehensive and focused it is an easy book to understand." "The book is a very solid platform for the beginning production student." "I am extremely satisfied with Zettl's textbook. It presents the basic principles in a comprehensive and fundamental manner."
