you're looking for quality fun that isn't too much like "school work" yet you know there is great learning going on underneath the bead work, this is a great book to have around. Fun activities to do with your little ones

By kelly  
Seems like it's mostly for younger children but still really great ideas I'm pretty happy with it  
0 of 0 people found the following review helpful. Engaging math play for families  
By Julia B.  
The book presents an engaging selection of activities you can do with your preschooler. Young children love building Vienn diagrams, playing matching games, creating dance patterns, making fun connections and - for those young entomologists - sorting beetles ( and yes, that is what is measured by IQ tests :)

Do you want your children to feel like algebra is beautiful, playful, and intuitive? Socks Are Like Pants, Cats Are Like Dogs inspires families and groups to play, solve, talk, and make math-together! The book is filled with a diverse collection of math games, puzzles, and activities exploring the mathematics of choosing, identifying and sorting. The activities inside are portable and easy to start. Many require little in the way of materials and preparation. Teacher and parent tested in real classrooms and living rooms, the ideas in this book are created to encourage endless inventiveness and variation. Be inspired to play and create, again and again, each time with a different, perhaps surprising result. Don't hesitate-play math today!
